About

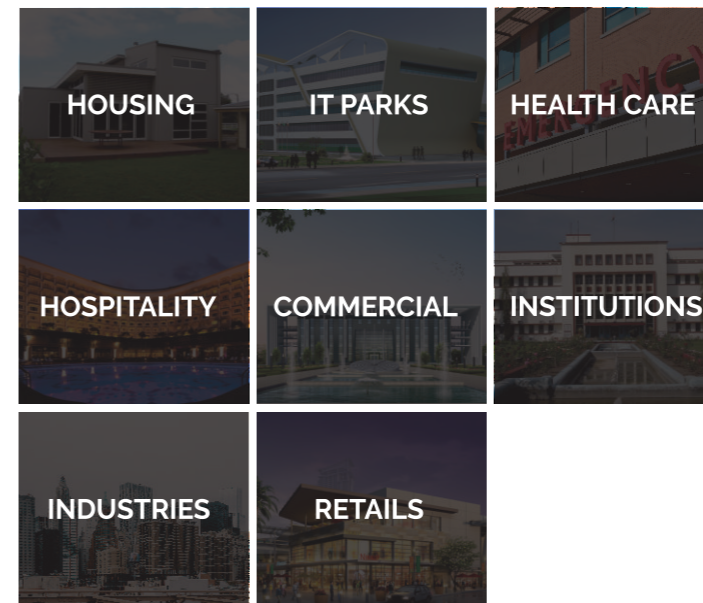

Insta Infra is a national construction company specialized in design, development and construction of precast buildings. Our parent company Ponkumar Cement Works (PCW) is a successful pioneer in the industry, manufacturing & commissioning precast walls more than 1000 kms for the past fifteen years. After delivering a whole a lot of quality work, we now focus on providing precast infrastructure solutions to all our clients.

Our customers can deliberately rely on our 15 + precast champions for design, detailing and construction of precast buildings. All our champions have at least 10+ years of experience in construction & design of commercial as well as residential projects.

All our offsite manufacturing processes are done in a more controlled environment. We have the state of art facility spread over 2000 square meter meeting international standards. We adopt only 100 % eco-friendly practices and are also well equipped to provide third party certification for all our samples.

We are Insta Infra working towards the next big win !

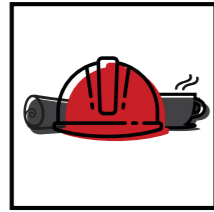

We Serve

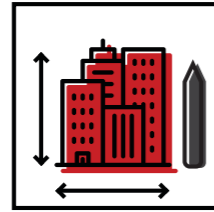

Why INSTA INFRA ?

- ^ Experienced Team
- ^ Cost-effective Solutions
- ^ Quality Focus
- ^ On Time Delivery
- ^ End to End Solution

Services

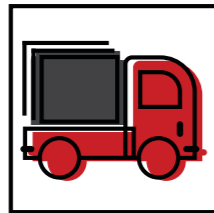

PROJECT PLANNING

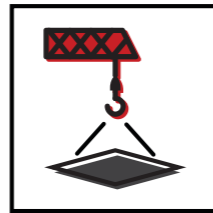

DESIGN & DETAILING

PRECAST PRODUCTION

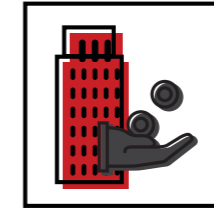

TRANSPORTATION

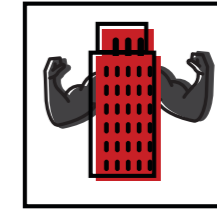

ERECTION

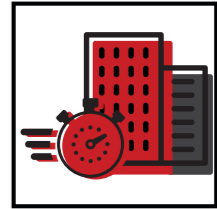

Why PRECAST ?

Cost Saving

High Quality & Durability

Speed Construction

- ^ Precast concrete is a proven solution for a wide variety of construction and engineering applications.
- ^ Comparatively no other construction system combines as many benefits as the precast building system does.
- ^ Enhanced Safety during Construction and End-users Utilization.

Modular Precast

is the smartest approach to build any kinds of buildings. Now, doesn't people of India deserve this approach? Before you say yes, we have made it accessible to everyone through INSTA INFRA.

Products

BEAMS & COLUMNS

Insta Infra offers an extremely wide range of technical options for precast beams and columns, based on the structural as well as the architectural criteria. We focus on reducing the quantity of beams and columns through our advanced design practices. All our beams are elegant, easy to erect and highly durable.

THE ADVANTAGE:

- ↗ Extremely durable compared to other alternatives.
- ↗ Unlimited flexibility based on design, shape & application.
- ↗ Clean & finished look for the structure of the building.
- ↗ Completely reduces expensive onsite work.
- ↗ Longer spans.

WALL PANELS

We produce wide variety of precast wall panels including external, internal, solid and sandwich panels. All our panels have extremely wide range of finishes, shapes and colors that can match the requirements of the most creative architect.

THE ADVANTAGE:

- ↗ Most efficient alternative to steel and masonry walls.
- ↗ Completely avoids the need for perimeter columns.
- ↗ Easy and quick installation.
- ↗ Heat resistance due to insulation.
- ↗ Better cement & water ratio does not allow water penetration.
- ↗ Easy building expansion.

STAIR CASES

We manufacture tailor made stair cases for residential, commercial and industrial projects. Our stairs design negates the need for costly labor & intensive shuttering. We provide an immediate access point between floor levels after quick installation.

THE ADVANTAGE:

- ↗ Cost, labor and material time savings.
- ↗ Most durable and very low maintenance.
- ↗ Any kinds of flights or landings can be installed within a day.
- ↗ Eliminates the need for framework and site poured concrete delays.
- ↗ No screed, topping or finishing works required.

BOUNDARY WALLS

We manufacture perimeter safety barriers based on the site requirements. We are already a pioneer in the industry with wall projects completed for about 1000 kms. Our infrastructure supports manufacturing of walls for any shapes and heights.

THE ADVANTAGE:

- ↗ Faster construction and erection time.
- ↗ Aesthetically appealing walls with unique textures
- ↗ More durable.
